

# Newly Purchased IOS Device Registration

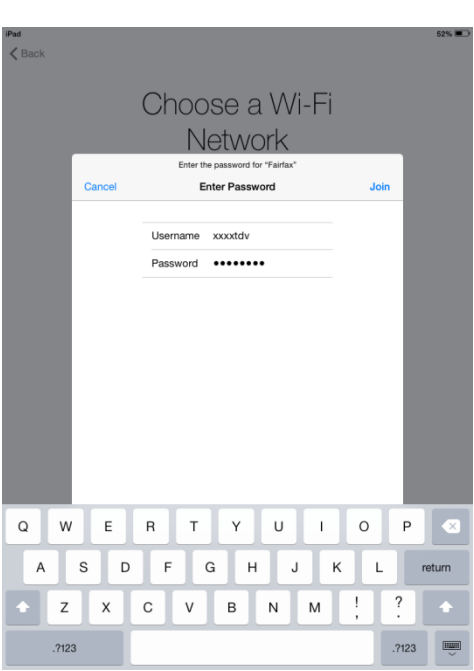

New IOS devices require registration through Apple prior to use. Device must have access to wireless network or connection to computer with iTunes for registration to successfully complete.

## Utilize *sitecodeTDV* account

Go through setup of new device. When you reach screen to Choose Wi-Fi Network, select Fairfax.

Input your *sitecodeTDV* account information when prompted for username and password and click Join.

When radius server validation prompt appears, click Accept.

You can now complete registration of new device.

Once completed be sure to properly configure device for the network by selecting forget network and going into settings and selecting FCPSonboard wireless network. Follow prompts to install a wireless profile on the device.
